

Local .env Configuration

Make sure you have a Pinecone account setup in order for the AI to work

Create a local .env file in the backend project root (or update the existing one) with the following values:

PORT=8080

DB_HOST=localhost

DB_PORT=5433

DB_USER=postgres

DB_NAME=your-accessible-flight

DB_SSLMODE=disable

AUTH_ENABLED=false

AIRPORT_PROVIDER=mock

AI_PROVIDERS=pinecone

PINECONE_API_KEY=<your-pinecone-api-key>

PINECONE_ASSISTANT_NAME=<your-assistant-name>

PINECONE_ASSISTANT_HOST=<your-pinecone-assistant-host>

PINECONE_MODEL=gpt-4o

PINECONE_API_VERSION=2025-10

HOTEL_PROVIDER=mock

Required values

Replace the following with your own Pinecone Assistant details:

- PINECONE_API_KEY – Your Pinecone API key.
- PINECONE_ASSISTANT_NAME – The name of your Pinecone Assistant.
- PINECONE_ASSISTANT_HOST – The Assistant host URL provided by Pinecone.

The prototype retrieves hotel information from the local mock hotel dataset `internal/hotel/data/hotels.json` using `HOTEL_PROVIDER=mock`

While Pinecone is used as the AI provider for response generation.

Create a text and upload it to your Pinecone Assistant so the assistant has at least one knowledge source available.

Example **knowledge.txt**:

Your Accessible Flight (YAF)

This is a prototype AI travel assistant for accessible aviation.

The assistant helps users with:

- Airport accessibility information
- Airline accessibility policies
- Accessible hotel recommendations
- Mobility equipment guidance
- Flight assistance information

Hotel recommendations are retrieved from the backend mock data source and should be treated as prototype data only.

How to run the AI

- Make a pinecone account
- Start the Docker Desktop and backend is running
- Make sure the .env file is accurate with the pinecone account
- Start the backend **go run ./cmd/api**
- Open a new powershell terminal
- Send a request with this command:

```
Invoke-RestMethod -Method POST ` -Uri  
"http://localhost:8080/api/ai/chat" ` -ContentType "application/json" ` -  
Body '{"content":"Find accessible hotels near SYD airport. Include  
wheelchair rooms and accessibility features."}'
```

- “content” is where is the question for the AI would be
